Our Company Statement

We the firm that believes in also aligning designs to socio-economic objectives as much as seeking to address infrastructural development. Construction methodologies that are labour intensive are preferred to conventional for reasons of alleviating famine, developing capacity and resuscitating microeconomics.

Through the SADC Millennium Development Goals (MDG), where water, sanitation, electricity and housing are prioritized in order to improve human life, programs have been developed to firstly achieve the goals and to ensure swiftness response to due delivery of service. SIDO Consulting Engineers is aware of the developed programs and aims to support them wholeheartedly.

Our Mission

The mission is to honour the demands of our client in the most efficient, practical and transparent manner while ensuring that the solutions provided are sustainable. This will be achieved through practicing Integrity, Accountability, Reliability and Honesty.

Our Vision

Our vision is to become the leading African engineering consulting firm.

Our Objective

The primary objective of the firm is to deliver proficient and pragmatic solutions to the market to the satisfaction of clients. This dynamic company upholds excellence in all business and inclined on sustaining integrity, honesty and reliability amongst other deliverables.

Our Experience

We have enormous experience within the Civil Engineering Industry and our track records confirms same. We pride ourselves with excellent service delivery and delivering beyond expectations.
